SANCTION REPORT

Client: Anytown Ambulance Corps
Client File Names: Individuals_April2020
Date of Client File Upload: 04/03/2020
Vigilant MEDSRun Date: 04/03/2020

Vigilant MEDS™ is a full service sanction exclusions solution, that validates your employees, vendors, providers, and volunteers against master lists - sanctioned, disbarred, and excluded provider. Each month, our clients upload their employees, vendors, providers, and volunteers information to be checked against our database of over 200,000 records including those of the EPLS/SAM/GSA, OIG/LEIE, OFAC/SDN, and all required state databases.

Results

Client Input Files: 2,123 Records

Comparisons were performed against the following:

LIST	
Office of Inspector General (OIG)	04/03/2020
Office of Medicaid Inspector General (OMIG)	04/03/2020
System for Award management (SAM)	04/03/2020
SDN	04/03/2020

Results for all files: *** Two (2) Potential NEW MATCHES ***
*** See FILE (separate cover) ***

NOTE All State and Federal files utilized in this process are the most up to date and complete files available at runtime.

Comment

Sanction testing for the period indicated has been completed. This review included a comparison of data, based upon scope (as noted above) against Exclusion Lists with refresh dates as indicated. The purpose of this review is to determine if any data element affiliated with your entity (as provided) has been excluded by a governmental agency. In circumstances where positive matches have been identified, details have been referred to Commercial Investigation Services (per agreement if applicable) or may be found on the attached page for your reference. The Taiga Group urges you to investigate all potential matches to ensure no individual, vendor or affiliated provider that has been excluded from participation in a governmental program is affiliated with your organization.

NOTE:
The Potential Match report will follow separately in a password protected file.
